

MONAD ARENAX / TESTNET WORKFLOW DESIGN PACK

Complete workflows & architecture

One inclusive protocol map plus focused visual workflows for the full Monad-first prediction exchange: discovery, trading, signed orders, parlay NFTs, Oracle Court, Forecast Arena, agentic AI, shared liquidity, creator revenue, indexing, runtime modes, and verification.

Chain ID 10143

AI advisory only

Wallet signature required

Test MON has no monetary value

All-inclusive system map

Experience, services, Monad contracts, events, safety, and fallback.

Monad ArenaX: all-inclusive architecture

Every user surface, service, contract, event stream, and safety boundary in one view.

EXPERIENCE

Sportsbook Arena

Live pulse, categories, watchlist, quick picks, transparent ticket.

Pro Exchange

Depth, smart router, EIP-712 orders, cancellation, timeline.

Portfolio + Parlay NFTs

Positions, claims, deterministic

AI + Risk Governor

Forecast tournament, ledgers, approval-only execution.

LP + Creator Studio

Shared vault, rebalance proposals, creator quality checks.

Monad Cockpit

Wallet switch, RPC latency, block pulse, explorer links.

APPLICATION SERVICES

React frontend

Typed context store, API clients, demo fallback, responsive UI.

Matcher + smart router

REST, WebSocket, TIF validation, reservations, settlement intents.

Advisory AI adapter

Model adapter when configured; deterministic explainable fallback.

Ponder indexer

Contract event ingestion, indexed freshness, GraphQL-style reads.

Postgres read model

Markets, portfolio, orderbook, agents, LP, creator revenue.

Demo fallback fixtures

Judge-ready continuity when RPC or optional services are slow.

MONAD TESTNET PROTOCOL

Monad RPC

Chain ID 10143 | test MON only

AMMPool.sol

Outcome shares + LP accounting

ParlayEngine.sol

ERC-721, liability, cashout, claim

SharedLiquidityVault.sol

Deposit, queue, allocate, rebalance

Reputation.sol

Authorized reporters, XP, badges

MarketFactory.sol

Market lifecycle + resolution state

ExchangeBook.sol

Signature, nonce, fills, cancel

OracleCouncil.sol

Commit, reveal, challenge, finalize

AI Pass.sol

Tier pass + credit consumption

LeagueFactory.sol

Community leagues + scoring

ResponsibleLimits.sol

Daily, exposure, order, AI caps

CreatorVault.sol

Creator, referral, protocol fees

ForecastArena.sol

Forecast commits + Brier scores

RiskGovernor.sol

Propose, approve, execute, block

Event stream

Trade, fill, cashout, oracle, LP, AI pass

Testnet safety envelope

TESTNET_ONLY | POINTS_ONLY | DEMO_FALLBACK | LEGAL_REVIEW_REQUIRED. AI recommends; the wallet authorizes.

advice

index

End-to-end product journey

From branded launch to indexed settlement.

End-to-end user workflow

A judge-ready journey from launch screen to indexed settlement.

1. Launch

Translucent Monad ArenaX fade + live pulse ticker

2. Connect

Add or switch Monad testnet; wallet verifies chain 10143

3. Discover

Trending, Live, Closing soon, New, categories, watchlist

4. Price

Load YES or NO quick pick into a transparent ticket

5. Review

Stake preset, payout preview, limits, Monad settlement label

6. Sign

Wallet authorizes AMM buy or EIP-712 exchange order

7. Compose

Add legs and mint transferable ERC-721 parlay NFT

8. Manage

Cashout quote, AI hedge advice, portfolio risk

9. Resolve

Oracle commit, reveal, challenge bond, council decision

10. Claim

Pull-based payout for winning shares or parlay

11. Index

Ponder refreshes portfolio, history, LP, leaderboard

12. Monitor

Monad cockpit shows block, explorer, finalized, indexed

AI advisory only

Wallet signature required

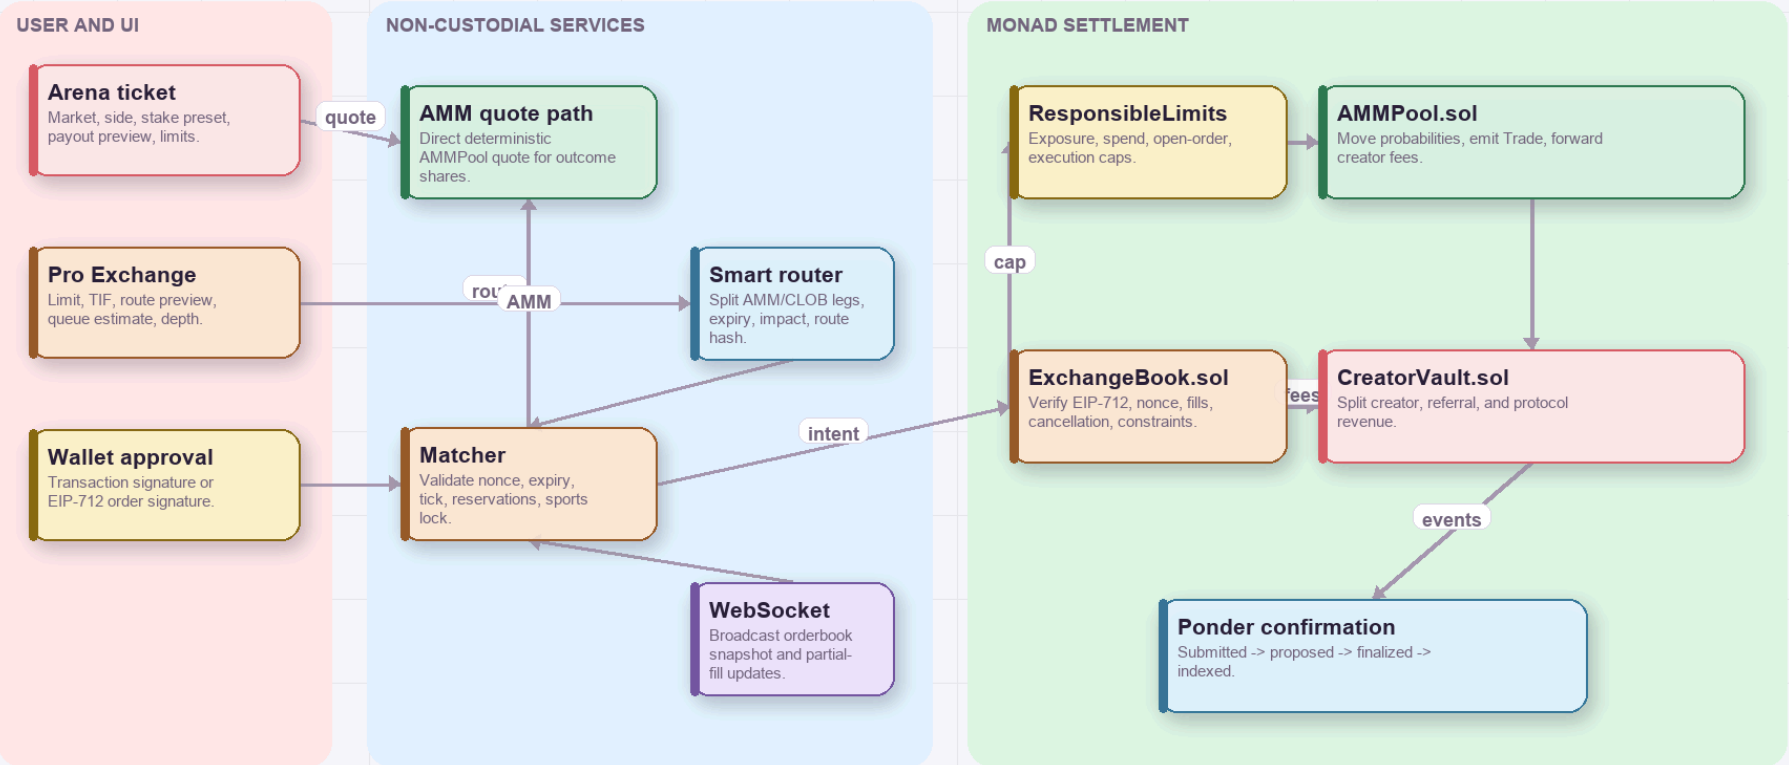

Test MON has no monetary value

AMM and Pro Exchange routing

Transparent execution and non-custodial settlement.

Trade execution: AMM and signed-order smart routing

Two transparent paths converge on Monad testnet settlement and indexed confirmation.

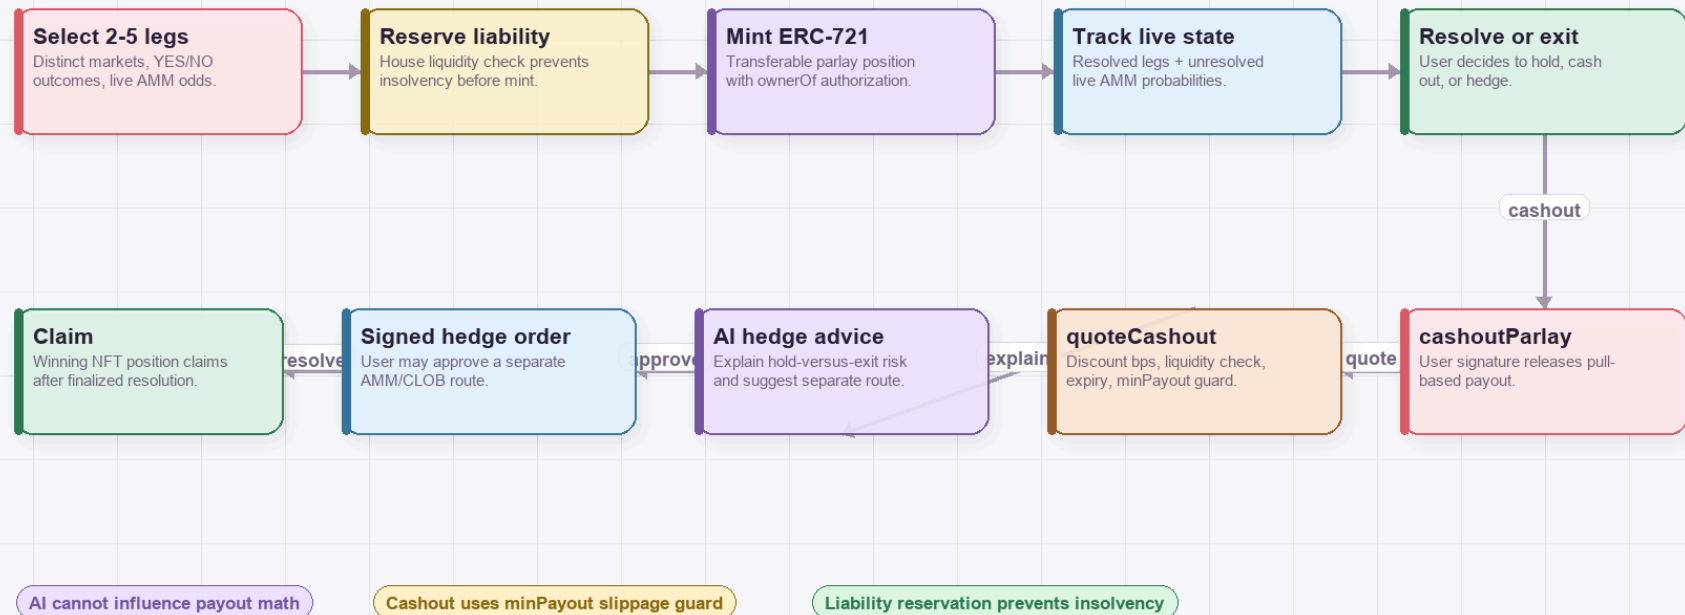

04

Parlay NFT lifecycle

Liability reserve, cashout, hedge, and claim.

Parlay NFT lifecycle: reserve, cash out, hedge, claim

Deterministic contract math remains authoritative; AI can explain or propose but never price the payout.

05

Oracle Court + Forecast Arena

Bonded dispute resolution and Brier-score reputation.

Oracle Court and Forecast Arena

Resolution integrity and agent reputation meet after the outcome is finalized.

ORACLE COURT

FORECAST ARENA

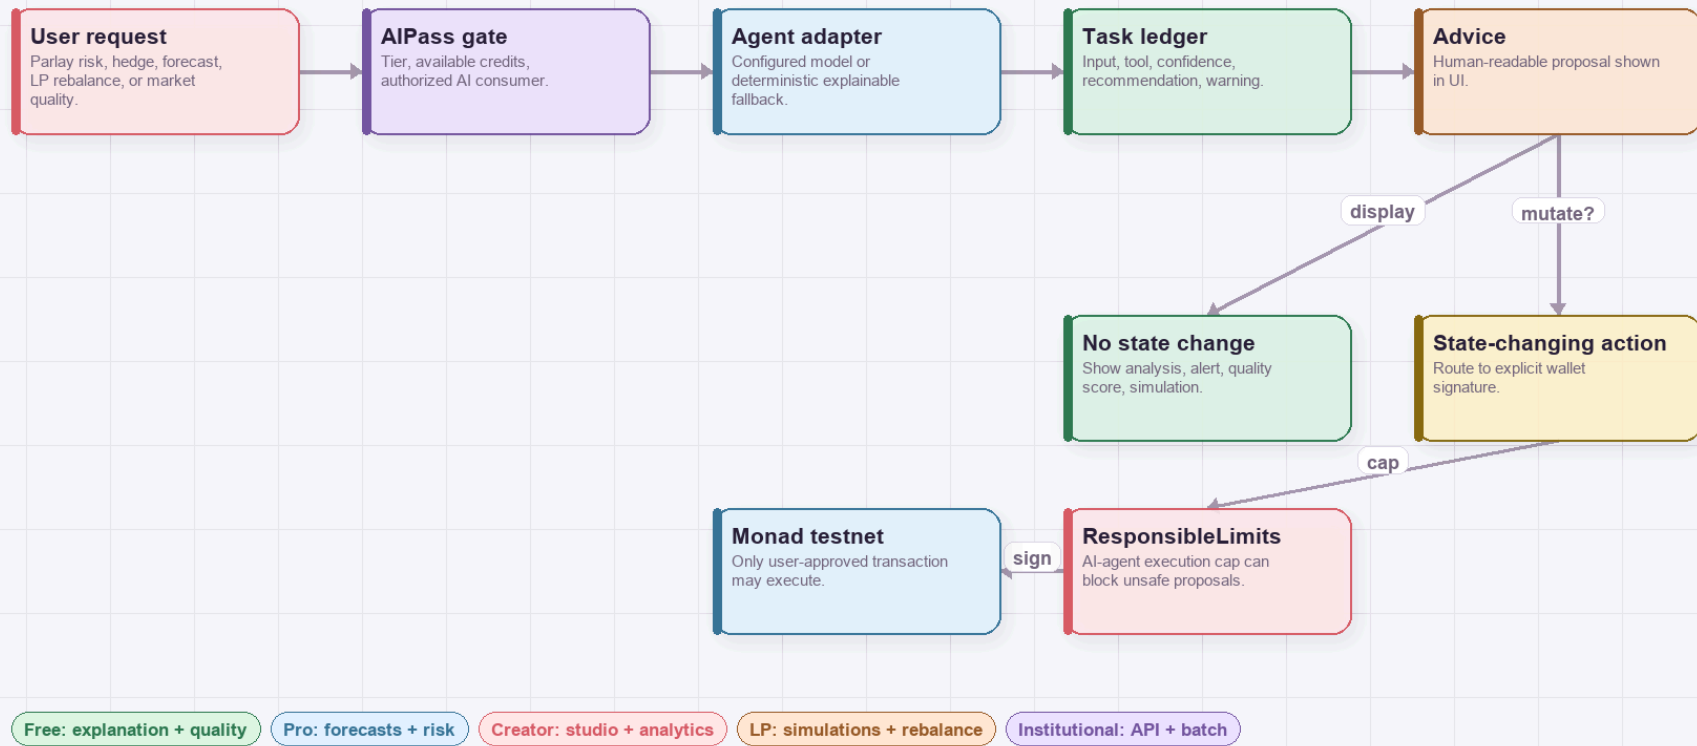

Agentic AI safety boundary

AI Pass gating, visible ledgers, and wallet approval.

Agentic AI safety boundary and pass gating

Visible ledgers, deterministic fallback, AI Pass credits, and wallet approval keep AI advisory.

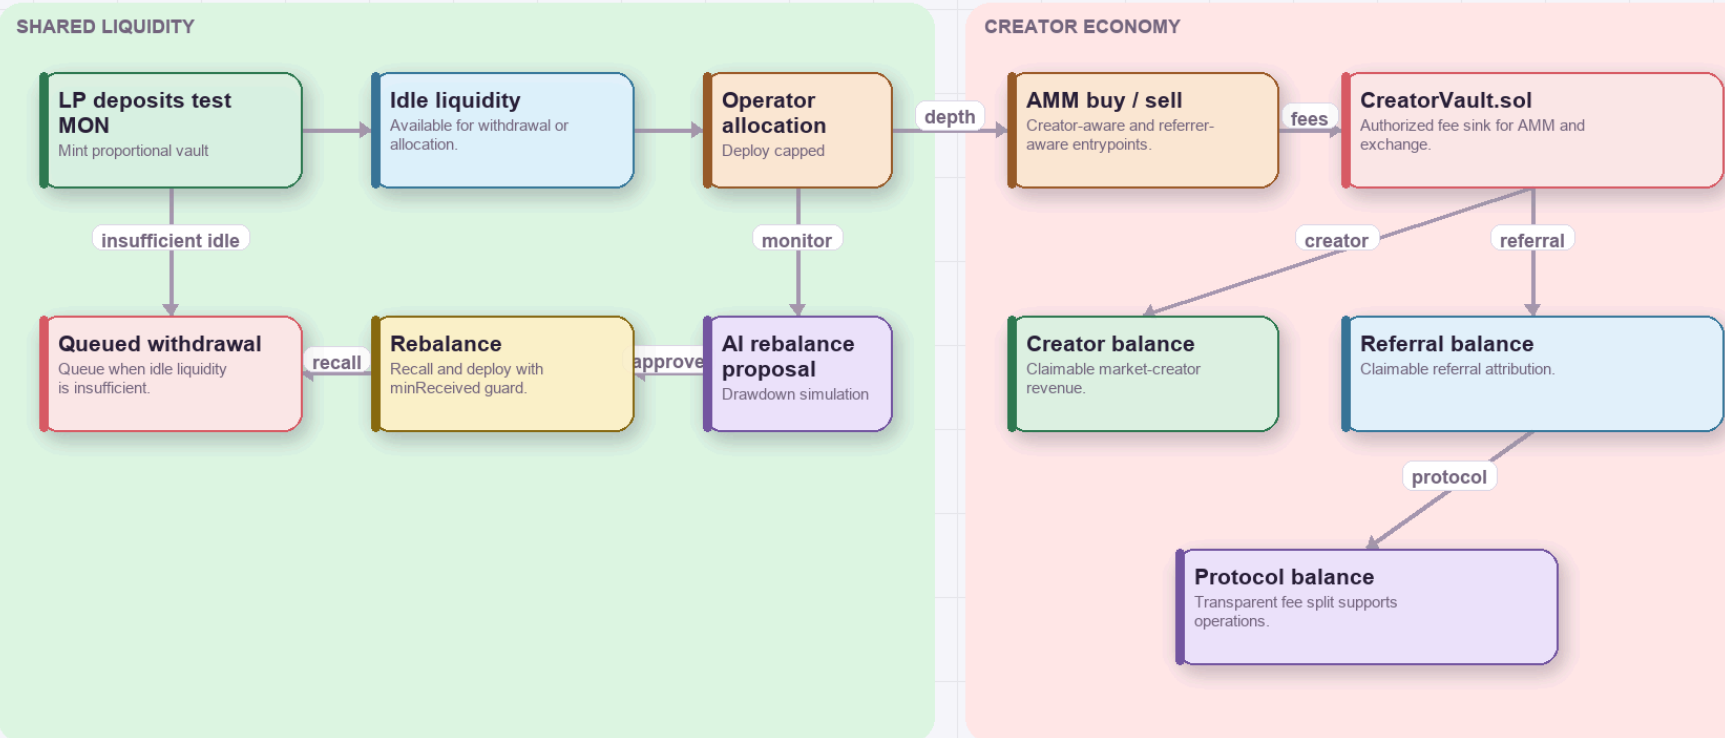

07

LP vault + creator economy

Shared liquidity, rebalancing, and transparent fee splits.

Shared LP vault and creator economy

Liquidity deployment, queued withdrawals, AI rebalancing, and fee distribution stay visible.

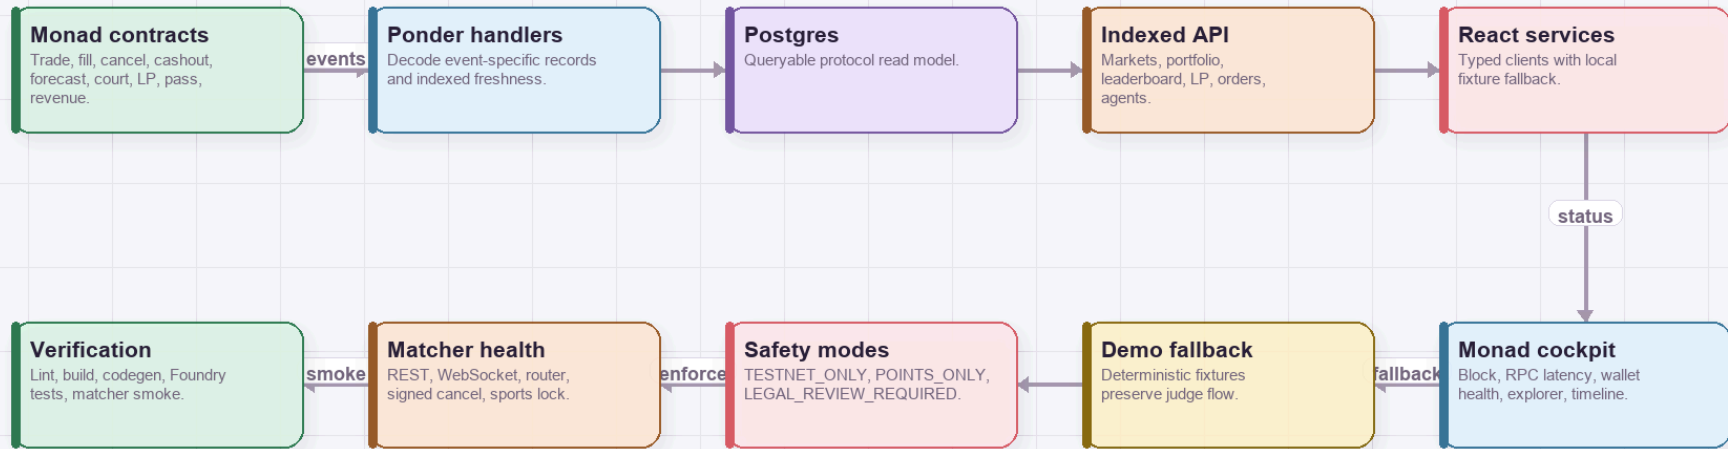

08

Indexer + operations

Ponder reads, runtime modes, cockpit, and verification.

Indexer, runtime modes, and operational observability

Monad events become fresh product reads while the app retains graceful demo continuity.

COMPLETENESS MATRIX

Nothing important is left off the map

Every implemented product domain is represented in the diagrams and linked back to its Monad-native protocol surface.

Markets

Factory, AMM, sportsbook board

Exchange

Router, matcher, signed settlement

Positions

Portfolio, parlay NFT, cashout

Integrity

Oracle Court, forecasts, reputation

AI

AIPass, task ledgers, governor

Liquidity

Shared vault, queue, rebalance

Economy

Creator, referral, protocol fees

Operations

Indexer, cockpit, modes, verify
